

Transforming driveways with lasting quality

At Driveways Plus, we design and install premium driveways that enhance kerb appeal, stand the test of time, and add real value to your home. Whether you're upgrading a worn surface or planning a complete redesign, our experienced team delivers reliable, high-quality solutions that are built to last.

When you need a premium driveway to enhance your home's kerb appeal or a flawless surfacing solution for a commercial project, there's only one name to trust for a finish that's built to last... DrivewaysPlus

Customers typically tell us

'We only ever consider a surfacing partner who is both reliable and delivers to the highest standards. Driveways Plus provides premium, durable driveways that add genuine value and kerb appeal.'

A gravel driveway leads towards a dark wooden barn with a thatched roof. The barn has a small window and a large door. The sky is blue with some clouds. The overall scene is a well-maintained property.

Delivering **reliable driveway solutions** across the South West, Thames Valley and South Wales.

TRANSFORMING DRIVEWAYS WITH LASTING QUALITY

With more homeowners investing in property improvements, demand for quality driveway installations continues to grow

At Driveways Plus, we offer a full range of driveway solutions for residential clients. Whether it's a new build or a home upgrade, we focus on delivering high-quality results that enhance both appearance and practicality.

QUALITY MEETS KERB APPEAL

DRIVEWAYSPLUS Services

EXPERT DRIVEWAY INSTALLATION, BUILT AROUND YOU

We understand that every property is unique, and so is every driveway. That's why we offer a tailored service from start to finish — from the first consultation through to final installation. Our team works with care and precision to create driveways that blend durability, style, and everyday practicality.

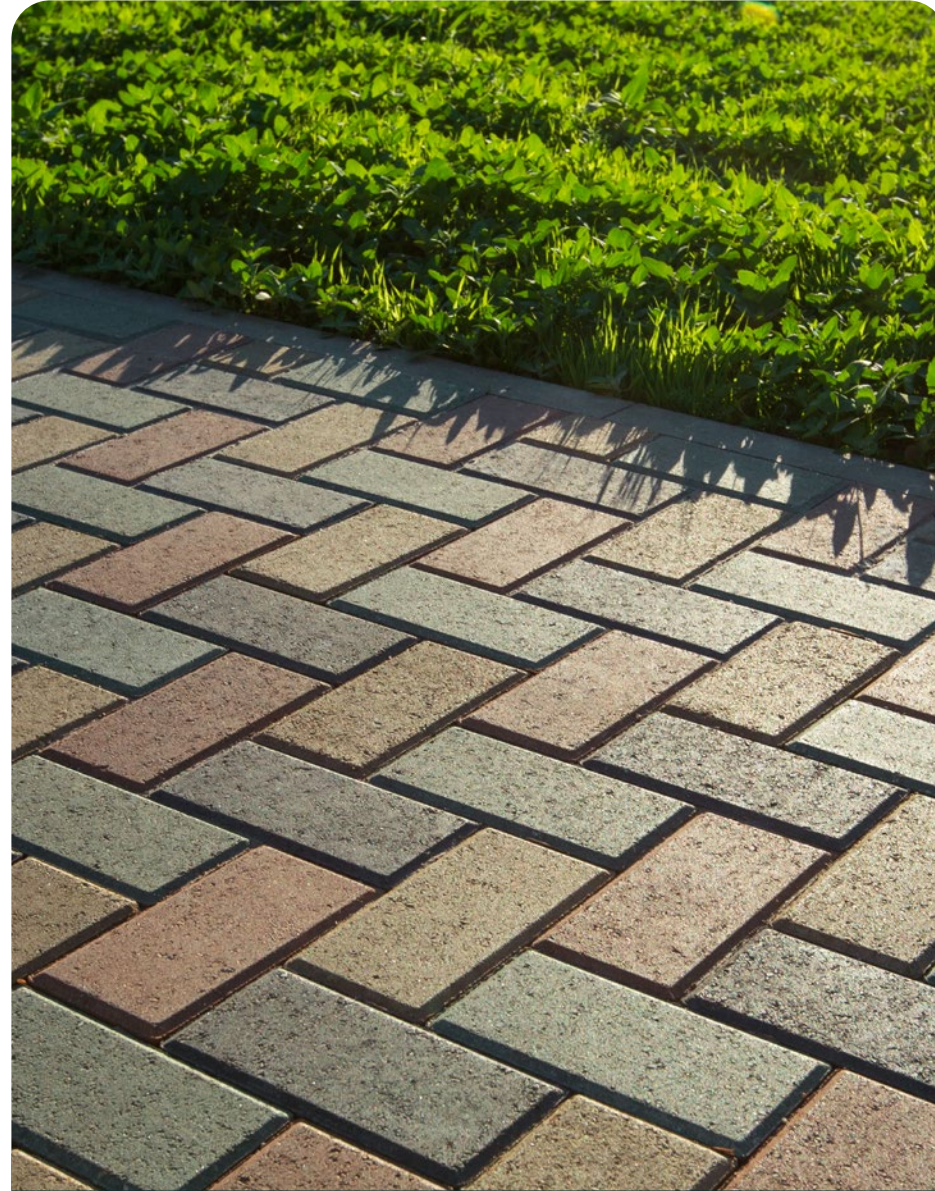

Resin driveways

Resin-bound driveways combine aesthetics with functionality. Made from natural aggregate and specialist resin, this surface provides a smooth, stone-like finish that complements both modern and traditional homes.

Concrete driveways

A concrete driveway is a solid investment – literally. It's built to carry weight, withstand wear, and hold its form for decades. Whether you prefer a smooth finish or something textured and decorative, we deliver clean, consistent results tailored to your home's style.

Block paving driveways

Block paving is one of the most versatile driveway options available. With a wide choice of colours, patterns, and finishes, it allows you to create a surface that perfectly complements your home and enhances its kerb appeal.

Tarmac driveways

When it comes to everyday reliability, tarmac is hard to beat. It's quick to install, highly resilient, and ideal for families with busy driveways. Whether you're replacing an old surface or starting from scratch, we deliver smooth, professional finishes built to last.

Reliable delivery

We turn up when we say we will and finish on schedule. Our team keeps you informed at every stage, ensuring a smooth, stress-free experience from start to finish.

Expert team

Our skilled installers bring years of hands-on experience to every project. We take pride in quality workmanship, attention to detail, and a job done properly — first time.

Tailored solutions

Every home is different, which is why we tailor each driveway to suit your property, style preferences, and practical needs. No templates — just thoughtful, bespoke design.

End to end service

From your first enquiry to the final sweep-up, we handle everything. Our team manages the entire process with care and precision, so you don't have to chase multiple trades or worry about a thing.
